Secondary Data Research

1

National Committees

34 groups, like UNICEF USA, raise money and spread awareness in wealthy countries.

2

Country Offices

Offices in over 190 countries and regions run programs directly using funding from the central org.

3

Student Chapters

More than 752 active high school clubs in 40 U.S. states currently work locally for children's rights.

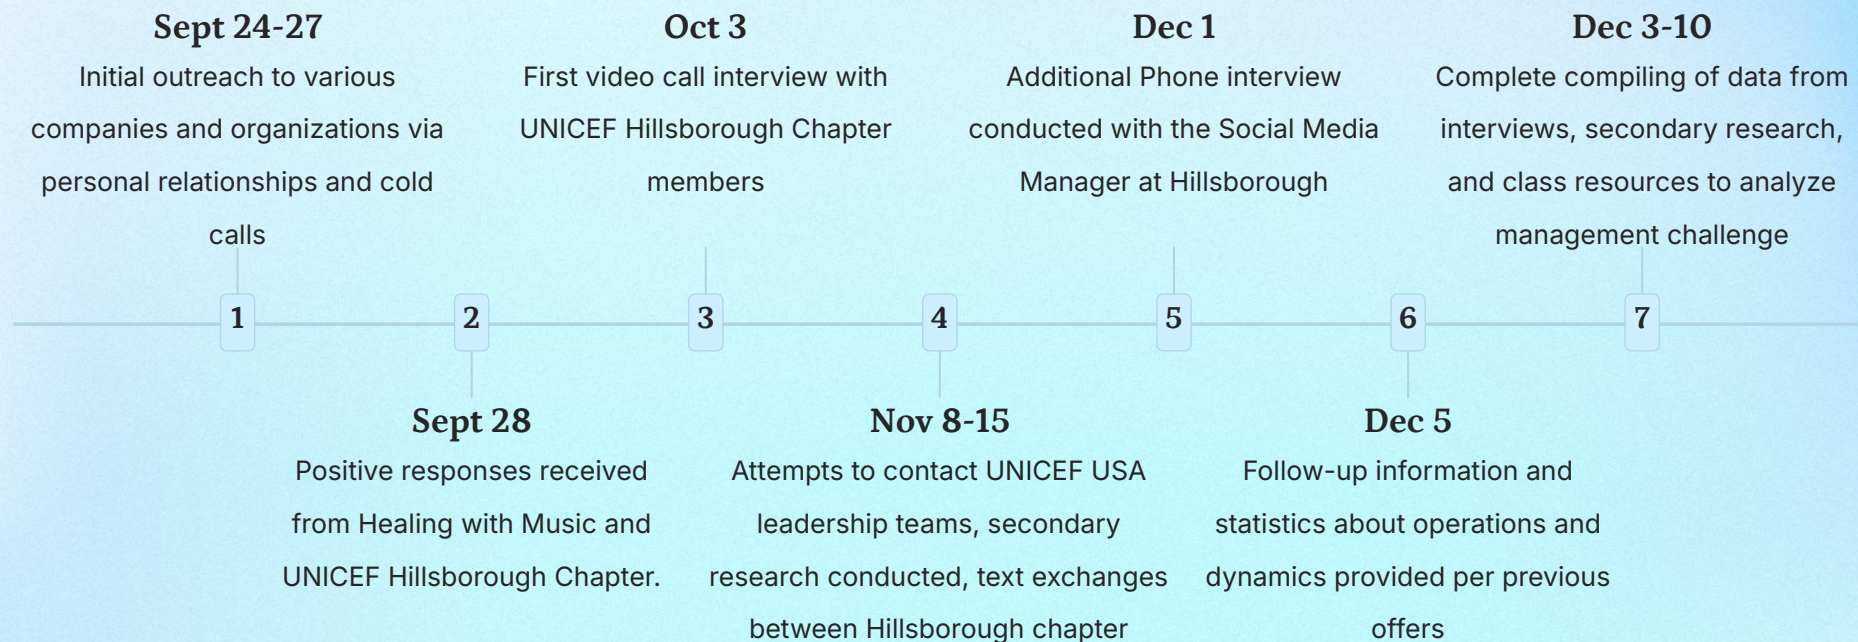

Competitors: Other Non-governmental organizations (NGO's) like Amnesty International, IRC, and OCHA, competing for funding, impact, and talent.

UNICEF USA: Operates a National Board of Directors, Leadership Team, Advisory Boards, NextGen Team, and Young Leaders.

- **Student Chapter/Clubs:** If registered through UNICEF USA, they can use official UNICEF name/branding, and access resources from staff including liability insurance for approved events

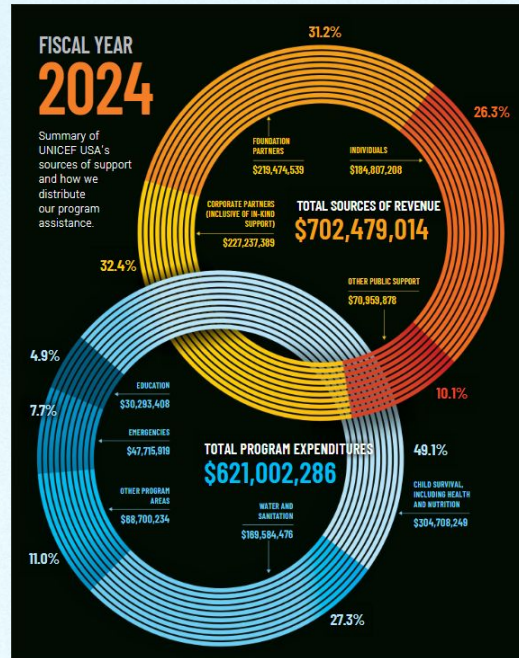

Data Collection Methods and Timeline

Sources of Data Collection: Board member Interviews via text/phone/video calls, UNICEF annual reports and financial disclosures, .org resources

Management Issues & Output Problems

- Member retention
- No past leadership to base off of (struggle even finding a teacher)
- Lack of money
 - UNICEF convention and Gala (transportation)
- Relative newness of the group
 - New beginnings, the typical struggles
 - Not a lot to show yet, but working on that
 - Advertising
- Demographics
 - Different motives (general, executive, teacher Emma Psemeneki)
 - Busy schedules (both exec members and general members)

OPPORTUNITIES:

- Halloween unicef (bags)
- Christmas cookie sales
- Collab with knit and crochet club
- Christmas wrapping services (they wrap gifts for people)
- Selling actual items for christmas fundraiser (clothes, ornaments, toys, etc.)

01

Analysis of Output Problem: Motivation

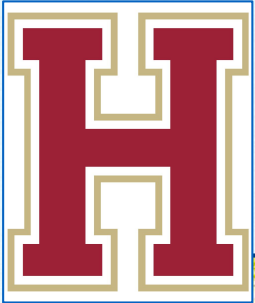

Motivation

- Motivation: the processes that account for an individual's intensity, direction, and persistence of effort towards attaining a goal
 - Motivational considerations:
 - Situational factors
 - Process factors
 - Individual differences
- McClelland's Needs Theory
 - Need for Achievement – Desire to excel quickly and independently
 - Need for Affiliation – Desire time to spend in social relationships and activities, joining groups, and being loved
 - Need for Power – Desire to influence, coach, teach or encourage others to achieve; strong discipline and self-respect

Motivation in UNICEF

- Output Problems:
 - Member Retention
 - Demographics

- High schoolers (ages 14-18) are motivated by their desire to excel in their careers by volunteering at UNICEF to show involvement and commitment to community service
- Many of the current board members are seniors, meaning that there is plenty of opportunity for underclassmen to fill these roles
- As a result, many of the members are underclassman which creates a team of students who are also still learning and developing
- At the high school's involvement fair, they noted that most of the current board members were seniors and put emphasis on the countless hours students would have the opportunity to receive if they joined which helped with member retention
- Most students are just joining because of these reasons but don't believe the club will last or don't understand UNICEF's goals

02

Analysis of Output Problem: Organizational Structure & Culture

Organizational Structure

Teamwork- single or shared leadership roles with individual and mutual accountability, collective work. With performance results being greater than the sum of individual inputs.

This UNICEF chapter is relatively new and needs to find a proper structure for organization. Being able to find the proper organization is a key factor that can help dictate the success of an organization.

Organizational Structure & Culture

The founding members of the organization had a common goal, a way to help children. The establishment of the organization came with obstacles, but being able to find the proper team among them is what helps them improve and help the organization.

A defining characteristic to choosing the best type of team is the personality and using each person's ability to the maximum potential.

A cross between both problem-solving and self managed teams were the best the fit with the analysis of the current team members and their abilities.

The members of the organization are able to come up with their own solutions and implement them as long they don't violate any school regulations.

Organizational Structure & Culture

In gathering information a lot was learned about each individual and their contributions to the organization. The president was a friendly person, conversation flowed naturally and was very enthusiastic about the program. Her ability to connect with is a trait that helps with leadership. The vice president had mentioned many creative ideas that she had for fundraisers.

Restructuring to adapt: As the year goes on, adjustments are made as needed. Responsibilities are redistributed as well as leadership. The vice president has shown her enthusiasm in the organization and is being considered to be switched to co-president alongside the president. On the other hand, other members have fallen short with their help, the secretary's lack of attendance has proven her type of dedication to the organization.

03

Our Recommendations

First Recommendation

Record and take notes on what works and didn't work this year to ensure a more effective UNICEF next year.

- Take minute meetings

Best practices and potential downsides of first recommendation

Take notes on the effectiveness of certain fundraisers and other events, helps plan out a more effective organizational structure for future years

DOWNSIDE:
There won't be any immediate improvement
Time consuming
Could lead to confusion if done bad

Second Recommendation

Create more of an effort to connect with the main UNICEF organization

- Meetings
- Speeches
- Headquarters visits.

Pros and Cons of Second Recommendation

Pros

- Allows members to feel more connected to the greater goal of the organization
- Creates a professional atmosphere because of interaction with professionals in the field
- Allows for students to learn management structure of a bigger organization

Cons

- Members and executives may be busy and unable to meet
- Not all members may be able to interact with executives
- May be intimidating for some students

Social Proof and Authority

- We can utilize social proof as a method of influence. According to Lily, other programs she is in use meeting notes and have been benefiting from it. Organizations, such as Choir Council and TriM, utilize meeting minutes to summarize notes that occur during meetings, and have significantly benefited from them. (as noted by Lily)
- Corporate organizations also use these (BMS, according to Rink Patel and Laura Javier)
 - Use the **influence principle of authority** to encourage communication with UNICEF's global community.
 - Emphasize that UNICEF's **higher-level leadership** can guide and support the organization.
 - Leverage the **perceived credibility** and expertise of a respected authority to strengthen the case for implementing the recommendations.

Thank You!
